

Health & Safety

Statement

At Prosec, employees and our business partners strive to provide adequate control of the health and safety risks arising as a result of tasks we are employed to undertake.

We embrace our responsibilities under Health and Safety Statute requirements, and encourage our sub contractors to do so, also ensuring suitable time and other resources are planned for and made available to safely complete scheduled tasks.

Prosec work with our sub contractors to ensure they provide suitable and sufficient trained supervision.

We proactively work with and consult employees and sub contractors on matters affecting their health and safety, including suitable and sufficient maintenance and provision of safe plant and equipment, the safe handling and use of substances, access, and test equipment.
